Condeco Wayfinder  
Smart directory software that  
displays meeting room information

## CONDECO WAYFINDER

The Condeco Wayfinder shows staff and visitors a directory listing of selected meetings and rooms throughout the day, including the host name and meeting times. This can be displayed on your choice of hardware, on any web enabled screen. The Wayfinder is incredibly simple to manage and features easy to read display information and directions to your meeting room.

## KEY FEATURES

### ENTIRELY WEB-BASED

This versatile solution can be displayed on any number of screens, in different sizes and resolutions. Administrators can access the product via the web without any need of specific software installation.

### CUSTOMISABLE

Condeco Wayfinder can be customised to your preference. You can change the content, column sizes, data types, direction arrows, availability, meeting time parameters on a per profile basis. Wayfinder also allows companies to customise the user interface with their own branding and additionally, the module can be incorporated with customers existing digital signage for a multimedia display.

### EASY-TO-USE

The administrative user interface has been designed to be easy-to-use without the need for technical knowledge or significant training.

### DISPLAYS DIRECTIONS

Each profile can have direction arrows added through the administrative interface which allows any specified meetings or rooms to provide a directional arrow to the location of the room. This helps to guide your visitors and meeting attendees to identify the correct meeting room quickly and gives them a hassle free experience in your workplace.

## QUICK IMPLEMENTATION

Condeco Wayfinder can be added with ease to an existing or new Condeco Enterprise implementation. Our skilled Condeco engineers will install and configure your Condeco Wayfinder upon the installation of Condeco Enterprise. All you need to start showing information is a screen connected to the Condeco server over the network or internet, and ability to display a Chrome browser.

## CREATE MULTIPLE DISPLAYS

The display screen allows system administrators to create multiple displays using 'Profiles'. The Profiles feature lets you create as many different sets of rooms as you desire and allows you to set up different displays, in different locations like the reception and the hallway.

## UNIQUE URLS

Each profile has a unique URL which can be used to display the Condeco Wayfinder page using a PC web browser connected to a display screen. Compatible Smart TVs can also be connected.
